

HYLO[®]-DUAL

**Dual Protection and Long Lasting
Relief from Symptoms of Allergy
Related Dry Eye**

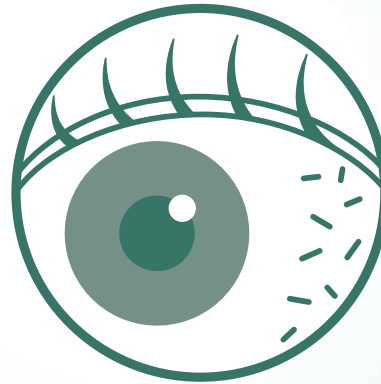

Annoying Symptoms

Allergies affect about 20% of the population, of whom about 20% experience eye problems¹

Typically these patients present with:

An Intense Itch or a
Burning Sensation

A Feeling of Grittiness
in the Eyes

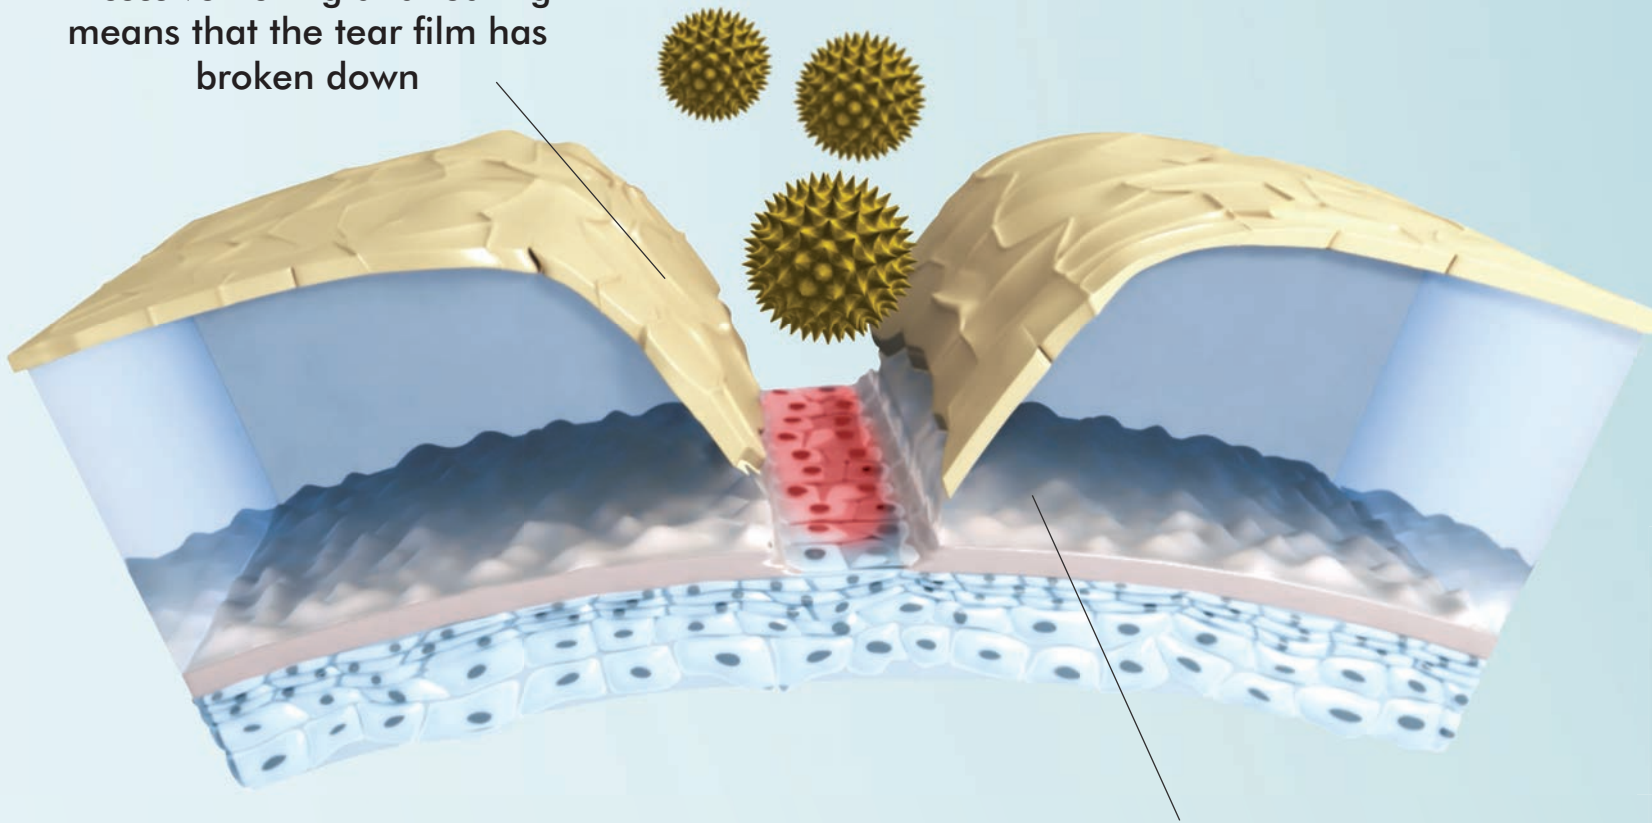

Mild Photophobia

HYLO[®]-DUAL

How allergens attack the surface of the eye

Excessive itching and tearing means that the tear film has broken down

This exposes the surface of the eye to allergens and the patient experiences continued annoying and activity limiting symptoms

Allergy Facts

- Over 50% of patients who seek treatment for allergies present with ocular symptoms²

Dual Ingredients Tackle Allergy Related Dry Eye and Protect the Surface of the Eye

Ectoin

Offers Dual Protection, preventing allergens from reaching the surface of the eye that cause annoying, activity limiting symptoms³

Sodium Hyaluronate

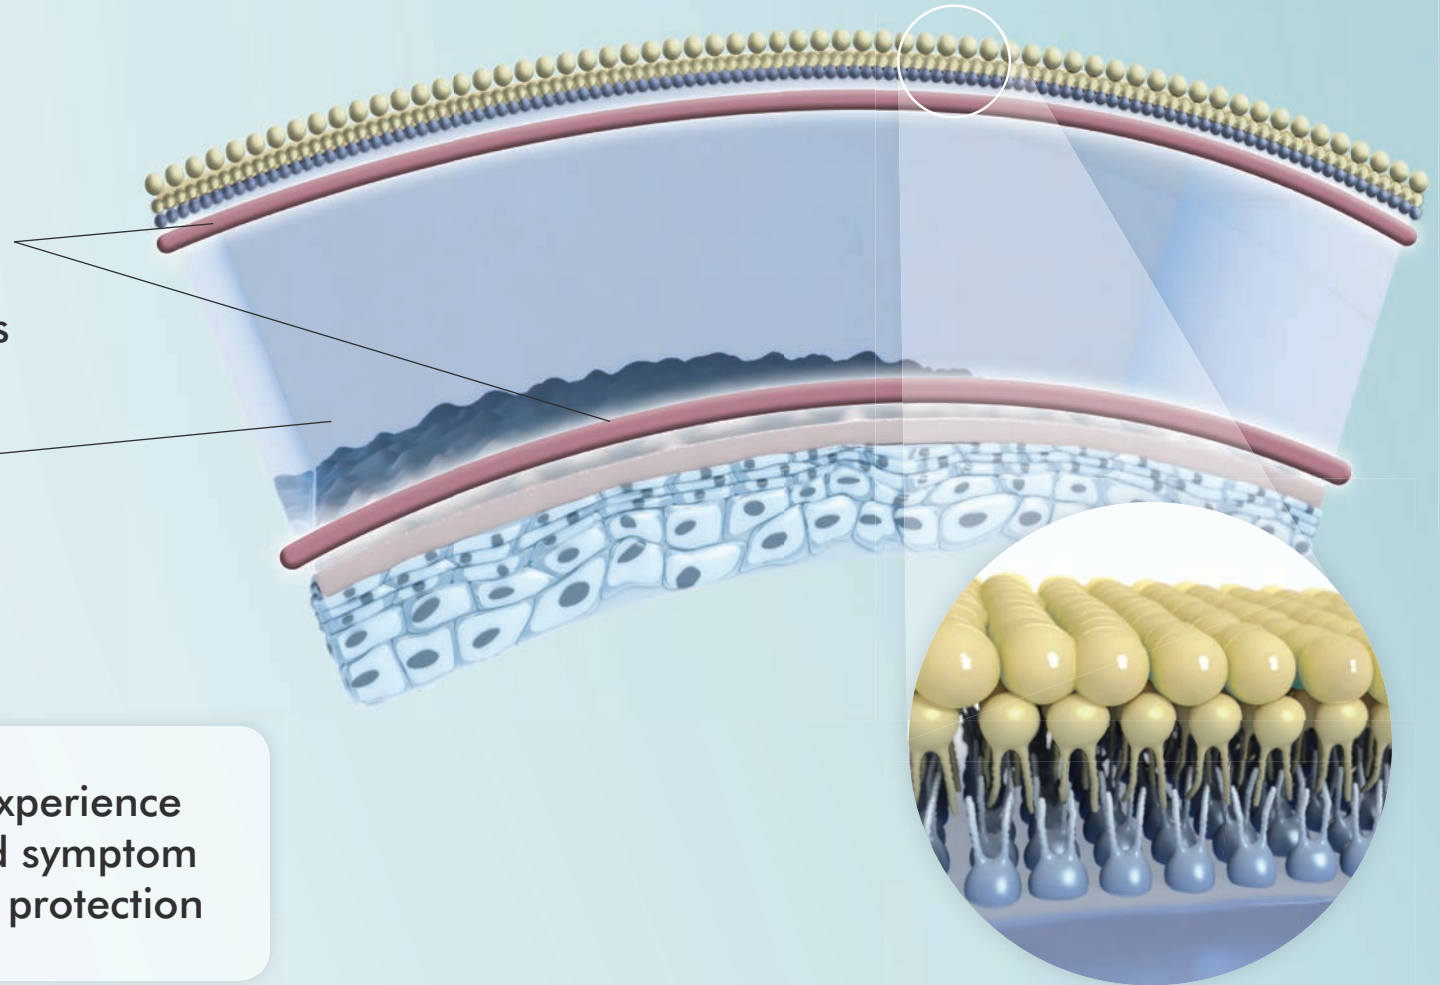

Supplements the tear and helps wash out unwanted allergens and offers long lasting protection

HYLO[®]-DUAL

The Dual Mode of Action Relieves and Protects...

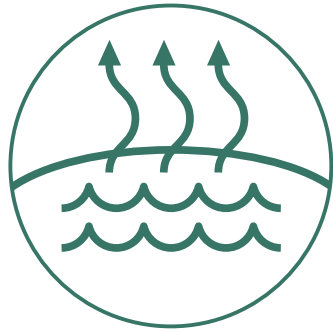

- **Sodium Hyaluronate and Ectoin** create a dual barrier that protects the surface of the eye by helping prevent allergens enter the tear film³
- **Sodium Hyaluronate** supplements the tear fluid and helps wash unwanted allergens from the surface of the eye

Patients experience prolonged symptom relief and protection

What is Ectoin?

Ectoin

Ectoin is produced by micro-organisms that flourish in harsh and dry environments such as salt lakes and deserts.

It is a safe and naturally occurring molecule that works inside the cell to prevent dehydration and enable the micro-organism to survive in the harshest of conditions.
